

# 499 Weekly Report

September 18<sup>th</sup>

**Hunter Hottest Sites**

Eli's Work

## **From Last Week**

- ☐ Figure out the roles of every team member.
- ☐ ~~Figure out how to capture destination frames on packets (The filtering)~~
- ☒ Test in different areas of the Hunter campus to see how much packets we can intercept.

## **Added Mid Week**

- ☒ schedule a time to talk about Tuesday's presentation
- ☒ Found new way to capture live packets and filter a website's string. Very efficient. (Pyshark)
- ☐ Work on Tuesday's presentation

## **For Next Week**

- ☐ Work with the filtering/capturing code I found this weekend to create objects for each website. on python and save time of packet in object's instance.
- ☐ Figure out what the role will be for some of us.
- ☐ Discuss where, when, and how to run Wireshark as a run test and see if the code will capture the data flawlessly.
